

## AMENDED CLAIMS

What is claimed is:

**1—4.** (withdrawn)

**5—11.** (canceled)

**12.** (withdrawn)

**13—18.** (canceled)

**19.** (withdrawn)

**20.** (canceled)

**21.** (withdrawn)

**22—23.** (canceled)

**24—30.** (withdrawn)

**31—54.** (canceled)

**55—56.** (withdrawn)

**57.** A computer-implemented method for automatically creating linked computer context, comprising:

- a) removing user-selected content from a parent context;
- b) creating and automatically naming a new context comprising said user-selected content; and
- c) inserting a reference to said new context in said parent context, wherein said reference comprises a uniquely identifying function of a name of said new context,

wherein said reference is inserted in the place of said removed user-selected content, and wherein the method is used for purposes comprising web authoring, hypertext editing, and weblogging.

**58.** The method of claim 57, wherein said parent context and said new context are selected from the group consisting of files, web pages, windows, frames, buffers, and sticky notes; or wherein said name comprises a uniquely identifying function of a timestamp at which said new context creation occurs; or wherein said reference is a hyperlink.

**59.** (withdrawn)
